Lighting for the Modern World

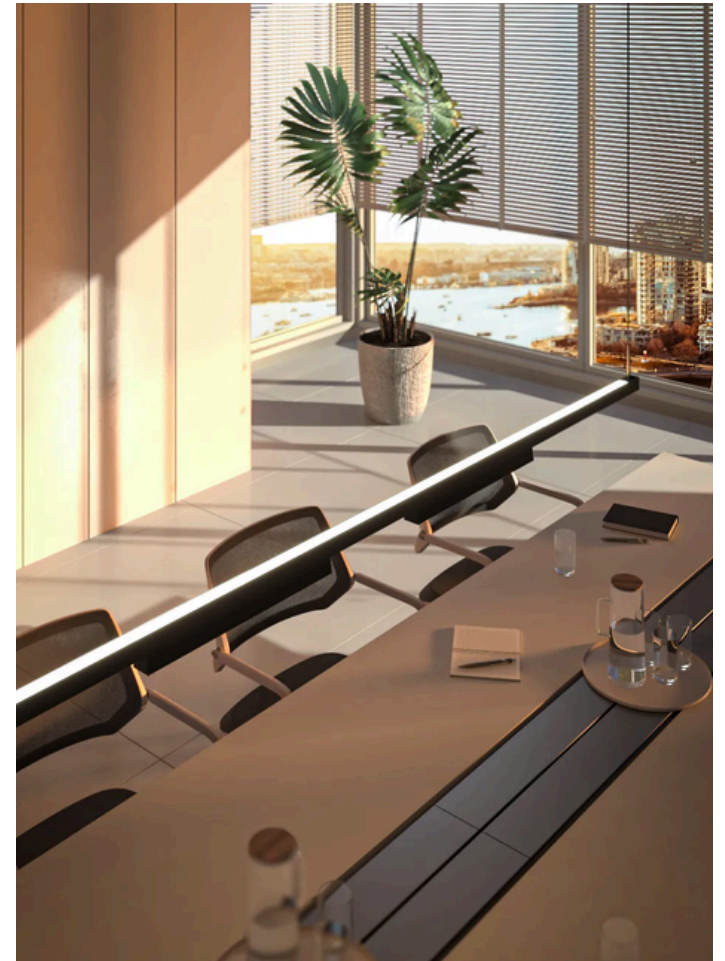

Thread's design and adjustable features provide precise control over light direction and placement, making it ideal for both ambient and task lighting. Its seamless blend of form and function enhances a wide range of interior spaces with effortless versatility.

Thread Family

Layered Lighting Flexibility

Thread offers several decorative elements that are elegant, timeless, and perfect for reception and meeting areas, hospitality, or residential settings among others, these include:

Layered Lighting Flexibility - With New Inserts Offering

Thread Family

Thread delivers multiple layers of light—direct, indirect, accent, and decorative—within a single, cohesive system. It's fully compatible with all Axis track inserts, offering maximum flexibility. Every module is designed for high efficacy and delivers 90+ CRI for outstanding light quality.

New Inserts Offering

Compatible with all StencilFlex

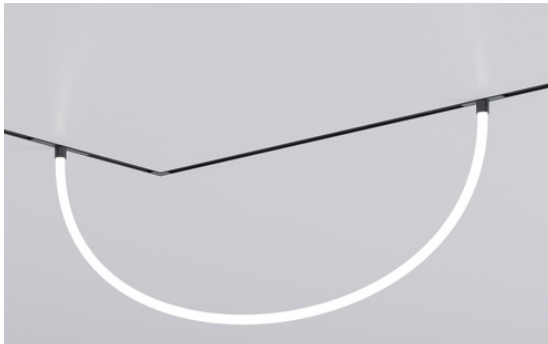

Shade

A versatile collection featuring three distinct shapes: **bell**, **cone**, and **dome**, each available in two sizes.

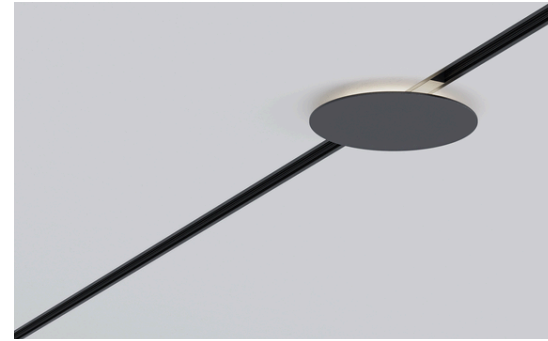

Orb:

5-inch frosted glass luminaire delivering over 1000 lumens of soft, 360-degree diffuse illumination. Designed for exceptional uniformity, Orb is available in both suspended **pendant** and **flush** mount options.

FlexTube:

A flexible, fully illuminated $\frac{3}{4}$ " silicon tube available in 4- and 8-foot lengths (custom lengths on request). It connects to the track at both ends, allowing it to wrap, link segments, or transition from ceiling to wall.

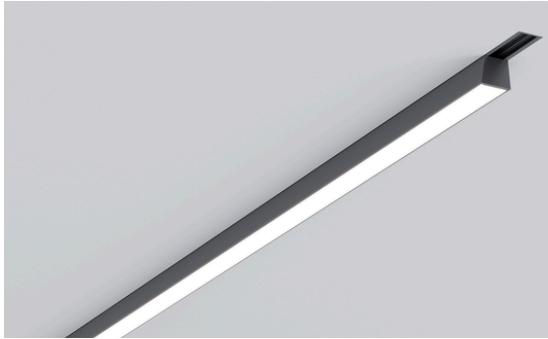

Disk Direct:

A 6½-inch backlit element that creates striking indirect lighting effects. Disk adds a bold visual accent to any space.

New Inserts Offering

Compatible with all StencilFlex

Spotless Lens Module:

Uniform linear glow, great for ambient applications. Available in 2-to-8-foot lengths.

Mikrolite Module:

The Mikrolite Module offers compact optics with up to 1200 lumens, ideal for low glare lighting. It comes in three sizes, two beam angles, and two baffle shapes, ensuring visual comfort with UGR <10, and is available in 9 premium finishes.

Flexible Integrated Module:

Designed to deliver flush, direct illumination, this adaptable lighting solution can also be seamlessly installed in curved recessed sections. A bridge version is available, enabling smooth power transfer between sections for continuous, uninterrupted light.

Thread family

Combining Form & Function

The modular track supports surface, pendant, and recessed mounting options, including flangeless or spackle flange finishes. The 48-volt system uses 60 or 100-watt remote drivers with 0-10V dimming, plus an optional DALI 2 control for individual element management.

Thread Family

Customizable & Modular

Built to adapt, Thread is a modular lighting system that evolves with your space. Ideal for architects, interior designers, and discerning specifiers seeking seamless integration and tailored solutions.

About Axis Lighting

Founded in 1991 and still family owned and managed, Axis is an important source for architectural lighting across North America and around the globe.

Over the last decade, the company has exhibited remarkable growth thanks to its commitment to Design Flexibility, Optimal Energy Efficiency and Responsive Customer Care. That leadership effort now extends to developing innovative lighting products and technologies, such as SurroundLite™, Pose® ribbons of light and StencilFlex®, on an ongoing basis.

On the strength of a broad and expanding product line, Axis has successfully completed lighting projects for high-profile clients including Apple, Chrysler, The Empire State Building, Google, Hyundai, Time Warner and McGill University, among many others.

Axis has the drive and the expertise to meet your needs and provide architectural lighting... your way.
